

Overview

Completed for £2,360 (inc. VAT, delivery and installation)

'If you go down in the woods today'. This cottage playhouse is perfect for any teddy bears picnic.

This white cottage style playhouse where you might find a 'Teddy Bear'!

It has a central door with a teddy bear cut out, glazed with polycarbonate.

There are 3 rectangular windows, two on the front and one on the right hand side, the front two have window boxes underneath.

The scalloped ridge and fascia board adds to the cute appeal of this playhouse.

Footprint depth: 1.0m (3' 4")

Playhouse width: 1.5m (5')

Playhouse depth: 0.9m (3')

Footprint note: Includes roof overhang

Colours

Finished with Sadolin Opaque Timber Protection. There are many more colour options available on our website.

Superwhite (Sadolin Opaque)

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Doors

Standard Door with Cut Out

All our doors are built with safety as a paramount concern. All are a special non-trap design, using a piano hinge down the whole length of the door, and then a rebate on the inside of the hinged side.

- When the door is in the closed position there is a taper between the door and frame, so should little fingers be left in the way they will not be pinched.
- The doors are held closed with heavy duty magnets; this prevents a child getting locked in accidentally.
- The doors have a knob inside and out
- The cut out window is glazed with unbreakable 2mm polycarbonate sheet.

Floor

Ground Floor

A good quality wooden floor with the added benefit of having a waterproof membrane

- 25mm x 50mm pressure treated timber bearers are fitted at ground level
- BBA approved waterproof membrane fitted, this membrane flaps around the edge and fits under the wall panels
- Top surface of 18mm exterior grade plywood

A soft floor is fitted to the ground floor of the playhouse once finished - this floor can be removed easily for cleaning.

Roof

Cedar Shingled Roof

Natural Canadian cedar shingles fitted give a beautiful natural finish. The shingles are initially a reddish brown colour, but within a year will naturally go a silver grey colour. It is recommended that the roof pitch is at least 30degrees to avoid the shingles becoming waterlogged during wet periods of weather.

- The roof bearers are fitted to span across the apex: the size would depend on the span but it would be a minimum of 75mm x 50mm. The timber would be good quality redwood, planned with swept edges
- 12mm wbp external grade plywood is fitted to the top surface
- Two layers of BBA approved breathable membrane is fitted as an under felt
- A layer of cedar shingles will be fitted as the top surface, this will be secured using galvanised staples
- The roof edges will be secured with a fascia board, the top finished with a ridge board and trim fitted to the bottom.
- Guttering is always recommended and can either be fitted by us or retrospectively by you once installed.

Build Level

Plywood Lined Walls (option 2 build)

- A good quality wall build incorporating plywood lining and a waterproof breathable membrane.
- The framework is built using a good quality 38mm x 50mm profile redwood timber, planned and sanded with swept edges.
- The framework is fixed using zinc yellow screws
- External grade WBP far eastern 6mm plywood is fitted to the outside face of the framework
- A breathable waterproof membrane is fitted on top of the plywood, this is BBA approved
- Waterproof tape is fitted at base of each panel
- 12 mm Redwood cladding is fitted to the outside of the framework (over the plywood and waterproof membrane), it is pinned with galvanised pins 38mm
- The outside face is finished with a paint/stain to suit

Included Accessories

These accessories are included in the featured build. You can customise your playhouse by adding more accessories. Please visit our website to see all the options.

Outside Options

Window Boxes

Other Options
