

Overview

Completed for £7,965 (inc. VAT, delivery and installation)

A castle playframe with a drawbridge, slide, climbing wall and rope ladder

This wooden play structure displays a castle like image to give your children the sense of having their very own castle. The main platform encompasses 2 large trees and is 6ft off the ground.

The platform is enclosed with castellated walls with slit windows and 2 fixed portcullis style doorways on the front elevation. There is an additional platform which is lower than the main platform, reached by a step down, which has a slide coming from it. The main platform is accessed via a walkway which has fixed balustrade rails along the side. The last 3ft of the walkway lifts up with a rope and pulley operated from within the castle.

In the centre of the main platform is an open access to a rope ladder taking you down to ground level. Further access to the main platform is made via a climbing wall which is to the left hand side

Dimensions

Footprint width: 5.8m (19')

Footprint depth: 4.6m (15')

Playhouse width: 4.5m (14' 9")

Playhouse depth: 1.8m (5' 10")

Colours

Finished with Sadolin Classic Timber Protection. There are many more colour options available on our website.

Woodruff (Sadolin Classic)

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Floor

Ground Level Decking

Decking can be laid at ground level either as a floor for a play-frame, a sub base for a play structure or to give an additional play area.

- The decking boards are good quality 35mm x 125mm grooved redwood boards that are pressure treated.
- The deck boards are screwed to the pressure treated 50mm x 100mm timber bearers
- A weed prevention membrane is fitted below the decking to ensure that there is no plant growth up through the boards.
- If it is being used as a sub-base or play area a skirt is fitted to match to deck.

For an additional cost the decking can be painted with an anti slip paint, please ask for details.

Windows

Open Unglazed Window

These windows are built as a separate unit; once finished they are sanded and treated prior to being fitted in the sides.

Build Level

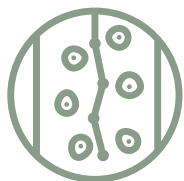

Playframe

- Our playframes have an external grade wall used on buildings and parts of projects where the weather will have full access to the inside as well as the outside.
- The framework is built using a good quality, 38mm x 50mm profile redwood timber planned and sanded with swept edges.
- The framework is fixed together using zinc yellow screws
- 12mm Redwood cladding is fitted to the outside of the framework, this is glued as well as pinned with 38mm galvanised pins
- The wall is finished inside and out with paint/preservative to suit
- If the top edge is exposed a tanolised edge trim is fitted.

Included Accessories

These accessories are included in the featured build. You can customise your playhouse by adding more accessories. Please visit our website to see all the options.

Active Fun
