

Overview

Completed for £5,105 (inc. VAT, delivery and installation)

A wonderful and distinctive playhouse with gable ends in the roof that really add character and individuality to this cottage playhouse.

This lovely cottage playhouse would look great in any garden or patio space.

The door is a stable door design with a letter box and diamond shape cut out.

There are opening windows on each side of the door and another 2 opening windows on the right hand side of the playhouse. All of these opening windows have window boxes underneath which can be a lovely way to introduce children to gardening.

There is a diamond shape window in the apex on the front and right hand side that not only are a lovely decorative touch but serve to allow more natural light into the playhouse.

The playhouse is insulated and then lined with plywood. A skirting board is fitted, to give a lovely finish. A foldaway table, foldaway shelf and toy box bench are all included.

Dimensions

Height to eaves: 1.4m (4' 6")

Maximum height: 2.1m (7')

Footprint width: 1.9m (6' 4")

Footprint depth: 1.3m (4' 4")

Playhouse width: 1.8m (6')

Playhouse depth: 1.2m (4')

Footprint note: Includes roof overhang

Colours

Finished with Sadolin Classic Timber Protection. There are many more colour options available on our website.

Woodruff (Sadolin Classic)
Wall

Jungle Green (Sadolin Opaque)
Door, Windows, Window boxes & fascia

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Doors

Stable Door with Cut Out

All our doors are built with safety as a paramount concern. All are special a non-trap design, using a piano hinge down the whole length of the door, and then a rebate on the inside of the hinged side.

- When the door is in the closed position there is a taper between the door and frame, so should little fingers be left in the way they will not be pinched.
- Doors are held closed with heavy duty magnets on both sections of the door; this prevents a child getting locked in accidentally, and has a special flange on the bottom half to prevent little fingers being caught when the top door is slammed against it.
- The top section opens independently of the bottom section.
- Both sections of the door have a knob inside and out
- The window on the door is glazed with unbreakable 2mm polycarbonate sheet. .

Floor

Ground Floor

A good quality wooden floor with the added benefit of having a waterproof membrane

- 25mm x 50mm pressure treated timber bearers are fitted at ground level
- BBA approved waterproof membrane fitted, this membrane flaps around the edge and fits under the wall panels
- Top surface of 18mm exterior grade plywood

A soft floor is fitted to the ground floor of the playhouse once finished - this floor can be removed easily for cleaning.

Roof

Cedar Shingled Roof

Natural Canadian cedar shingles fitted give a beautiful natural finish. The shingles are initially a reddish brown colour, but within a year will naturally go a silver grey colour. It is recommended that the roof pitch is at least 30degrees to avoid the shingles becoming waterlogged during wet periods of weather.

- The roof bearers are fitted to span across the apex: the size would depend on the span but it would be a minimum of 75mm x 50mm. The timber would be good quality redwood, planned with swept edges
- 12mm wbp external grade plywood is fitted to the top surface
- Two layers of BBA approved breathable membrane is fitted as an under felt
- A layer of cedar shingles will be fitted as the top surface, this will be secured using galvanised staples
- The roof edges will be secured with a fascia board, the top finished with a ridge board and trim fitted to the bottom.
- Guttering is always recommended and can either be fitted by us or retrospectively by you once installed.

Windows

Opening Glazed

The windows are built as separate units; once they have been sanded and treated they are glazed with 2mm polycarbonate sheet. They are then fitted and sealed using clear silicon into the wall. The polycarbonate used is completely clear and will not fade or become brittle with time, it is 200 times the strength of glass making it virtually shatter proof. The opening window is hinged on either the right or left using a stainless steel piano hinge and our special non trap design. When the window is in the closed position there is a taper between the casement and frame so should any little fingers be in the way they will not get pinched. The casements are held using a brass handle and casement stay.

Build Level

Insulated and Plywood Lined Walls (option 3 build)

- The top of the range specification incorporating insulation and plywood lining, it is ideal if the building is to be heated and used extensively in the colder weather.
- The framework is built using 38mm x 50mm profile redwood timber planned and sanded with swept edges.
- The framework is fixed using zinc yellow screws
- A breathable waterproof membrane is fitted on top of the framework this is BBA approved
- Waterproof tape is fitted at the base of each panel
- 12 mm Redwood cladding is fitted to the outside of the framework, it is pinned with galvanised pins 38mm
- 20mm insulation panels are fitted within the frame work
- 6mm external grade WBP far eastern plywood is fitted to the inside face with skirting and architrave fitted around the windows and doors
- The outside face is finished with a paint/stain to suit
