

Overview

Completed for £3,120 (inc. VAT, delivery and installation)

A delightful little playhouse proving that space for children to call their own can be found in even the smallest corner of a garden or patio.

This lovely little playhouse fits snugly into the corner of a garden providing a great space for children to call their own.

There is a stable door with a heart shape cut out and a letter box. A window on each side of the door, one opening and one non-opening, allows natural light into the playhouse and both windows have a window box underneath.

The window boxes can be used to plant flowers and when planted provide another very personal touch to the playhouse.

Internally the playhouse has curtains and a blackboard fitted.

Dimensions

Height to eaves: 1.2m (4')

Maximum height: 1.7m (5' 6")

Footprint width: 1.1m (3' 8")

Footprint depth: 1.1m (3' 8")

Playhouse width: 1.0m (3' 3")

Playhouse depth: 1.0m (3' 3")

Footprint note: Includes roof overhang

Colours

Finished with Sadolin Classic Timber Protection. There are many more colour options available on our website.

Gossamer Blue (Sadolin Classic)

Walls

Opal White (Sadolin Classic)

Door, Windows, Windows boxes & fascia

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Doors

Stable Door with Cut Out

All our doors are built with safety as a paramount concern. All are special a non-trap design, using a piano hinge down the whole length of the door, and then a rebate on the inside of the hinged side.

- When the door is in the closed position there is a taper between the door and frame, so should little fingers be left in the way they will not be pinched.
- Doors are held closed with heavy duty magnets on both sections of the door; this prevents a child getting locked in accidentally, and has a special flange on the bottom half to prevent little fingers being caught when the top door is slammed against it.
- The top section opens independently of the bottom section.
- Both sections of the door have a knob inside and out
- The window on the door is glazed with unbreakable 2mm polycarbonate sheet. .

Floor

Ground Floor

A good quality wooden floor with the added benefit of having a waterproof membrane

- 25mm x 50mm pressure treated timber bearers are fitted at ground level
- BBA approved waterproof membrane fitted, this membrane flaps around the edge and fits under the wall panels
- Top surface of 18mm exterior grade plywood

A soft floor is fitted to the ground floor of the playhouse once finished - this floor can be removed easily for cleaning.

Roof

Felt Shingled Roof

A similar product to mineral felt, with the same durability but a more attractive finish which resembles individual house tiles

- The roof bearers are fitted to span across the apex: the size would depend on the span but it would be a minimum of 75mm x 50mm. The timber would be good quality redwood, planned with swept edges
- 12mm wbp external grade plywood is fitted to the top surface
- A layer of BBA approved breathable membrane is fitted as an under felt
- A layer of felt shingles will be fitted as the top surface, this will be secured using galvanised staples
- The roof edges will be secured with a fascia board, the top finished with a ridge board and trim fitted to the bottom.
- Guttering is always recommended and can either be fitted by us or retrospectively by you once installed.

Windows

Non-opening Glazed

The windows are built as separate units; once they have been sanded and treated they are glazed with 2mm polycarbonate sheet. They are then fitted and sealed using clear silicon into the wall. The polycarbonate used is completely clear and will not fade or become brittle with time; it is 200 times the strength of glass making it virtually shatter proof.

Opening Glazed

The windows are built as separate units; once they have been sanded and treated they are glazed with 2mm polycarbonate sheet. They are then fitted and sealed using clear silicon into the wall. The polycarbonate used is completely clear and will not fade or become brittle with time, it is 200 times the strength of glass making it virtually shatter proof. The opening window is hinged on either the right or left using a stainless steel piano hinge and our special non trap design. When the window is in the closed position there is a taper between the casement and frame so should any little fingers be in the way they will not get pinched. The casements are held using a brass handle and casement stay.

Build Level

Plywood Lined Walls (option 2 build)

- A good quality wall build incorporating plywood lining and a waterproof breathable membrane.
- The framework is built using a good quality 38mm x 50mm profile redwood timber, planned and sanded with swept edges.
- The framework is fixed using zinc yellow screws
- External grade WBP far eastern 6mm plywood is fitted to the outside face of the framework
- A breathable waterproof membrane is fitted on top of the plywood, this is BBA approved
- Waterproof tape is fitted at base of each panel
- 12 mm Redwood cladding is fitted to the outside of the framework (over the plywood and waterproof membrane), it is pinned with galvanised pins 38mm
- The outside face is finished with a paint/stain to suit
