

Overview

Completed for £1,650 (inc. VAT, delivery and installation)

Children can be the Kings or Queens of their very own castle with this lovely castle style playframe.

Built primarily with younger children in mind, this mini-castle offers boys and girls a play space to call their own, allowing them to embark on lots of adventures in the safety of their own garden.

The wooden play castle sits to the rear and left hand side of a solid decking base and forms part of the perimeter of the play frame with a low fence on either side completing the boundary.

There is unencumbered access to the decking at the front which means there is plenty of room for young knights (and ladies) to wield swords and also means there is plenty of room for a little picnic when play gets too exhausting.

There are two open doorways to the castle itself, one to the front which is flanked by two open castle style windows, and one to the right hand side which has a additional castle window to its left.

Internally there is a small low step which adds an element of interest and challenge especially to younger children as they need to step up onto it to gain access to the second doorway. The step also offers the young knights and ladies a more sedate seating and/or meeting space.

The doorways are 3ft 10in (1.2m) high and 18in (0.4m) wide, The step bench is 9in (22cm) high and the fence is 19in (0.5m) high, rising to 40in (1m) when adjacent to the platform.

Only available in colours shown

Dimensions

Maximum height: 1.7m (5' 6")

Door & window frames

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Doors

Open Doorways

Open doorways are normally used on our castles or open structures, providing a great access route to areas

- Made from good quality redwood, planned with swept edges
- Fits snugly within the wall of the structure to give a neat doorway/entrance
- Fully treated in your choice of colour from our standard range

Floor

Ground Level Decking

Decking can be laid at ground level either as a floor for a play-frame, a sub base for a play structure or to give an additional play area.

- The decking boards are good quality 35mm x 125mm grooved redwood boards that are pressure treated.
- The deck boards are screwed to the pressure treated 50mm x 100mm timber bearers
- A weed prevention membrane is fitted below the decking to ensure that there is no plant growth up through the boards.
- If it is being used as a sub-base or play area a skirt is fitted to match to deck.

For an additional cost the decking can be painted with an anti slip paint, please ask for details.

Windows

Open Unglazed Window

These windows are built as a separate unit; once finished they are sanded and treated prior to being fitted in the sides.

Build Level

Playframe

- Our playframes have an external grade wall used on buildings and parts of projects where the weather will have full access to the inside as well as the outside.
- The framework is built using a good quality, 38mm x 50mm profile redwood timber planned and sanded with swept edges.
- The framework is fixed together using zinc yellow screws
- 12mm Redwood cladding is fitted to the outside of the framework, this is glued as well as pinned with 38mm galvanised pins
- The wall is finished inside and out with paint/preservative to suit
- If the top edge is exposed a tanolised edge trim is fitted.

Accessories

You can customise your playhouse by adding accessories. Please visit our website to see all the options.

Other Options

This playhouse can be customised to your preference by changing the build specification. The different build levels are explained in detail on our website.

This table shows the cost of the different build levels that are available.
